Estimated Completion Date:

Vehicle Plate #/State:

By signing below, it is understood that the Construction Special Use parking permit is intended to regulate parking on city streets. The permit has been designed for motorized construction vehicles which must park in the City's right of way (e.g. not on sidewalks). To protect the safety of the public and the safety of the construction workers, only motorized vehicles are valid with this parking permit. There shall be a limit of three permits issued for a project. The Construction Special Use parking permit is renewed monthly at the discretion of the Parking Administration Manager.

All parking is determined by a first come, first serve basis. Maximum time limits for parking do not apply while using this Construction Special Use parking permit. This permit is only valid for a specific block face, vehicle and construction project.

All traffic and safety rules apply to all vehicles. In addition to parking violations, vehicles may be cited for traffic violations. A copy of this application must be provided upon request while on construction site.

The permit holder must pay prior to the 5th of every month. These permits are not prorated and are nonrefundable.
